Music Information			
Most pictures will show on the screen between 4-6 seconds, with 6 seconds being the ideal amount of time. For example, a 30-picture section would last for about 180 seconds or 3 minutes. While creating your DVD, if we find the song you selected is too long for the amount of pictures we can fade the song out. We will make our best attempt to find a good point in the song to fade the song out if we need too.
